INDEX TO VOLUME 20[1]

*Starred items are "Shorter Notes"

Adams, R. A. *Ellipticity and regularity for periodic nonlinear equations*, 24.

Andrews, G. E. *Two theorems of Euler and a general partition theorem*, 499.

Ang, D. D. *A nonlinear steady state temperature problem for a semi-infinite slab*, 303.

Au-Yeung, Yik-Hoi. *A theorem on a mapping from a sphere to the circle and the simultaneous diagonalization of two Hermitian matrices*, 545.

Baer, R. M. *Computability by normal algorithms*, 551.

Ball, B. J., Ford, Jo and Thomas, E. S., Jr. *Extending real maps defined on a subset of a disk*, 75.

*Barth, K. F. and Schneider, W. J. *A short proof of a lemma of G. R. MacLane*, 604.

Beesack, P. R. *Comparison theorems and integral inequalities for Volterra integral equations*, 61.

Belluce, L. P. and Kirk, W. A. *Fixed-point theorems for certain classes of nonexpansive mappings*, 141.

Bonnice, W. E. and Reay, J. R. *Relative interiors of convex hulls*, 246.

Boyd, D. W. and Wong, J. S. W. *On nonlinear contractions*, 458.

Brown, J. B. *Density of one graph along another*, 147.

Brualdi, R. A. *An extension of Banach's mapping theorem*, 520.

Bryant, J. L. and Seebeck, C. L. III. *An equivalence theorem for embeddings of compact absolute neighborhood retracts*, 256.

Cabaña, E. M. *On stochastic differentials in Hilbert spaces*, 259.

Chacon, R. V. and Olsen, J. *Dominated estimates of positive contractions*, 266.

Chalice, D. R. *Characterizations for approximately normal algebras*, 415.

Chrislock, J. L. and Tamura, T. *Notes on subdirect products of semigroups and rectangular bands*, 511.

Cossey, John. *Critical groups and the lattice of varieties*, 217.

Darst, R. B. *Properties of Lusin sets with applications to probability*, 348.

Davis, E. D. *A remark on Prüfer rings*, 235.

de Branges, Louis and Trutt, David. *Charlier spaces of entire functions*, 134.

Dorroh, J. R. *The localization of the strict topology via bounded sets*, 413.

Edelstein, Michael. *A short proof of a theorem of L. Janos*, 509.

Farkas, H. M. *Weierstrass points and analytic submanifolds of Teichmueller space*, 35.

Fillmore, P. A. and Topping, D. M. *Sums of irreducible operators*, 131.

Fink, A. M. *Eigenvalue of the square of a function*, 73.

Ford, Jo. See Ball, B. J.

*Fridy, J. A. *A note on absolute summability*, 285.

Giambalvo. V. *The* mod *p cohomology of* $BO\langle 4k \rangle$, 593.

Gillette, Richard and Van Buskirk, James. *Monotone n-frames are tame*, 381.

Gilmore, Maurice. *Some Whitehead products on odd spheres*, 375.

Glasser, M. L. *A note on the Littlewood-Tauber Theorem*, 39.

Goldstein, Myron. *Normal operators*, 41.

Goto, Morikuni. *On an arcwise connected subgroup of a Lie group*, 157.

———. *A remark on a theorem of A. Weil*. 163.

Gray, Alfred. *Almost complex submanifolds of the six sphere*, 277.

Guinn, T. and Landesman, E. M. *Minimal solutions to a class of parabolic partial differential equations*, 19.

Hans, R. J. *On the Reinhardt-Mahler Theorem*, 391.

Hemminger, R. L. *On reconstructing a graph*, 185.

Herman, G. T. *A new hierarchy of elementary functions*, 557.

[1] Number 3 of this volume will contain the Author Index for Volumes 11–20.

Hogan, G. T. and Kappe, W. P. *On the H_π-problem for finite p-groups*, 450.
Horelick, Brindell. *Pointed minimal sets and S-regularity*, 150.
Isbell, J. R. *A set whose square can map onto a perfect set*, 254.
———. *A counterexample in weighted majority games*, 590.
Jans, J. P. *Note on* QF-1 *algebras*, 225.
Johnson, B. E. *Separate continuity and measurability*, 420.
Kadish, A. *A uniqueness theorem for some nonlinear boundary value problems*, 27.
Kahn, D. S. *A differential in the Adams spectral sequence*, 188.
Kalmbach, Gudrun. *Deformation retracts and weak deformation retracts of noncompact manifolds*, 539.
Kappe, W. P. See Hogan, G. T.
Keesling, J. E. *Open mappings and closed subsets of the domain in general metric spaces*, 238.
Keogh, F. R. *On a theorem of Fejér and Riesz*, 45.
Keogh, F. R. and Merkes, E. P. *A coefficient inequality for certain classes of analytic functions*, 8.
Kim, Soon-Kyu. *A theorem on the Hurewicz fiberings*, 171.
Kirk, W. A. See Belluce, L. P.
Klimko, E. M. and Sucheston, Louis. *An operator ergodic theorem for sequences of functions*, 272.
Kreith, Kurt. *A remark on a comparison theorem of Swanson*, 549.
Kunz, Ernst. *Remark on the purity of the branch locus*, 378.
Kurtz, L. C. *Inclusion theorems for generalized Hausdorff summability methods*, 385.
Kuttler, J. R. and Sigillito, V. G. *An inequality for a Stekloff eigenvalue by the method of defect*, 357.
Labelle, Gilbert. *Concerning polynomials on the unit interval*, 321.
Lacher, R. C. *Cell-like spaces*, 598.
Lagnese, J. E. *Note on a theorem of C. T. Taam concerning bounded solutions of nonlinear differential equations*, 351.
Landesman, E. M. See Guinn, T.
Larsen, K. M. *An external harmonic function*, 333.
Lausch, H. *Formations of groups and π-decomposability*, 203.
Lee, M. P. and Madan, M. L. *On the Galois cohomology of the ring of integers in an algebraic number field*, 405.
Leininger, C. W. *Some properties of a generalized Hausdorff mean*, 88.
———. *Convergence-preservation criteria for a generalized Hausdorff mean*, 97.
Lindström, Bernt. *Determinants on semilattices*, 207.
Lininger, Lloyd. *On topological transformation groups*, 191.
Lloyd, S. P. *On the L_2 space of a Banach limit*, 429.
Lubin, Jonathan. *Galois endomorphisms of the torsion subgroup of certain formal groups*, 229.
McIntosh, Alan. *On the closed graph theorem*, 397.
Macki, J. W. and Wong, J. S. W. *Oscillation theorems for linear second order ordinary differential equations*, 67.
Madan, M. L. See Lee, M. P.
Manis, M. E. *Valuations on a commutative ring*, 193.
Merkes, E. P. See Keogh, F. R.
Michler, Gerhard. *On quasi-local noetherian rings*, 222.
Millett, K. C. *Normal structures for locally flat embeddings*, 580.
Mordeson, J. N. and Vinograde, B. *Tensor products of simple pure inseparable field extensions*, 209.

Mosher, R. E. *Note on the generalized Whitney sum*, 383.
Netanyahu, E. and Reichaw, M. *A theorem on infinite positive matrices*, 13.
Oberg, R. J. *On the local existence of solutions of certain functional-differential equations*, 295.
Olsen, J. See Chacon, R. V.
Ornstein, Donald. *On the existence of stationary optimal strategies*, 563.
Osborn, Howard. *Correction to my paper "The Morse index theorem,"* 337.
Osborn, J. M. *A norm on separable noncommutative Jordan algebras of degree 2*, 423.
Owings, J. C., Jr. *A canonical linear order for the maximal chains of a tree*, 280.
Padmanabhan, R. *Two identities for lattices*, 409.
Page, S. S. *Rigidity of generalized uniserial and Frobenius algebras*, 199.
Palmer, T. W. *Totally bounded sets of precompact linear operators*, 101.
Parthasarathy, T. *Product solutions for simple games. II*, 107.
Passman, D. S. *On the semisimplicity of modular group algebras*, 515.
Pederson, R. N. *A note on the local coefficient problem*, 345.
Peng, T. A. *Finite groups with pro-normal subgroups*, 232.
Peterson, D. C. *Extending functions to operate on proper classes*, 553.
Petersson, H. P. *Isotopisms of Jordan algebras*, 477.
Pfeifer, G. L. *The Stone-Čech compactification of an irreducibly connected space*, 531.
*Raghavendran, R. *Toeplitz-Hausdorff theorem on numerical ranges*, 284.
Ramsay, R. T. *On compactification and structure of topological groups*, 585.
Reay, J. R. See Bonnice, W. E.
Reichaw, M. See Netanyahu, E.
Reid, W. T. *Remarks on the Morse index theorem*, 339.
Rieffel, M. A. *On the continuity of certain intertwining operators, centralizers, and positive linear functionals*, 455.
Rohatgi, V. K. *On convergence rates in the law of large numbers for weighted sums of independent random variables*, 570.
Roitberg, Joseph. *On the* PL *noninvariance of the span of a smooth manifold*, 575.
Rosenblum, Marvin. *The operator equation $BX-XA=Q$ with selfadjoint A and B*, 115.
Rudin, M. E. *A new proof that metric spaces are paracompact*, 603.
Rutledge, Dorothy. *A generator for a semigroup of nonlinear transformations*, 491.
Scarborough, C. T. *Closed graphs and closed projections*, 465.
Schaefer, Paul. *Almost convergent and almost summable sequences*, 51.
Schneider, W. J. See Barth, K. F.
Schwabauer, Robert. *A note on commutative semigroups*, 503.
Seebeck, C. L. III. See Bryant, J. L.
Segal, S. L. *A Tauberian relative of the Landau-Ingham Tauberian theorem*, 287.
Shapiro, V. L. *The approximate divergence operator*, 55.
Silverman, Edward. *Equicontinuity and n-length*, 483.
Sinclair, A. M. *Continuous derivations on Banach algebras*, 166.
Singh, Y. P. *The asymptotic behavior of solutions of linear third order differential equations*, 309.
Smith, John. *A remark on class numbers of number field extensions*, 388.
Stepp, J. W. *A note on maximal locally compact semigroups*, 251.
Stiles, W. J. *On inversions in normed linear spaces*, 505.
Strang, Gilbert. *Approximating semigroups and the consistency of difference schemes*, 1.
Sucheston, Louis. See Klimko, E. M.
Tachikawa, Hiroyuki, *A generalization of quasi-Frobenius rings*, 471.
Takaguchi, M. *Commuting projections with assigned ranges*, 368.

Takesaki, Masamichi. *Remarks on the reduction theory of von Neumann algebras*, 434.
Tamura, T. See Chrislock, J. L.
Thomas, E. S., Jr. See Ball, B. J.
Thompson, Maynard. *Complex polynomial interpolation to continuous boundary data*, 327.
Topping, D. M. See Fillmore, P. A.
Trutt, David. See de Branges, Louis.
Turner, R. E. L. *A note on eigenvalues of normal transformations*, 30.
Turquette, A. R. *Generalizable Kleene logics*, 361.
Van Buskirk, James. See Gillette, Richard.
Vinograde, B. See Mordeson, J. N.
Wainger, Stephen. *A problem of Wiener and the failure of a principle for Fourier series with positive coefficients*, 16.
Waterhouse, W. C. *A classification of almost full formal groups*, 426.
Waterman, Daniel. *On the summability of the differentiated Fourier series*. II, 342.
Weil, C. E. *On approximate and Peano derivatives*, 487.
Wells, B. B., Jr. *Weak compactness of measures*, 124.
Wenger, R. *Self-injective semigroup rings for finite inverse semigroups*, 213.
Wiegand, Roger. *Sheaf cohomology of locally compact totally disconnected spaces*, 533.
Wilkinson, J. B. *A lower bound for the dimension of certain G_δ sets in completely normal spaces*, 175.
Williams, J. P. *Operators similar to their adjoints*, 121.
Wollenberg, L. S. *Derivations of the Lie algebra of polynomials under Poisson bracket*, 315.
Wong, J. S. W. See Boyd, D. W.
———. See Macki, J. W.
Yohe, J. M. *Structure of hereditarily infinite dimensional spaces*, 179.
*Yorke, J. A. *Permutations and two sequences with the same cluster set*, 606.
Younglove, J. N. *A locally connected, complete Moore space on which every real-valued continuous function is constant*, 527.
Zaks, Joseph. *On a minimality property of complexes*, 439.
———. *On finite decompositions of E^{2n-1}*, 445.
Ziemer, W. P. *The area and variation of linearly continuous functions*, 81.

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION
(Act of October 23, 1962; Section 4369, Title 39, United States Code)

1. *Date of filing*: September 24, 1968
2. *Title of Publication*: Proceedings of the American Mathematical Society
3. *Frequency of issue*: Monthly
4. *Location of known office of publication*: 321 South Main Street, P.O. Box 6248, Providence, Rhode Island 02904
5. *Location of the headquarters or general business offices of the publishers*: Same
6. *Names and addresses of publisher, editor, and managing editor. Publisher*: American Mathematical Society, 321 South Main Street, Providence, Rhode Island 02904. *Editor*: Arthur Mattuck, Room 2-275, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139. *Managing editor*: None.
7. *Owner*: None
8. *Known bondholders, mortgagees, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages or other securities*: None.
9. The purpose, function and nonprofit status of this organization and the exempt status for Federal income tax purposes have not changed during the preceding 12 months.
10. Extent and nature of circulation

	Average number of copies of each issue during preceding 12 months	Actual number of copies of single issue published nearest to filing date
A. Total No. copies printed	7,000	6,800
B. Mail subscriptions	6,000	5,990
C. Total paid circulation	6,000	5,990
D. Free distribution	2	7
E. Total distribution	6,002	5,997
F. Office use	998	803
G. Total	7,000	6,800

I certify that the statements made by me above are correct and complete.—GORDON L. WALKER
